

J3 connector is for the potentiometer that varies the distortion, and the potentiometers' value should be 100k ohm.

J4 connector is for the potentiometer that varies the tone, and the potentiometers' value should be 20k ohm.

J5 connector is for the potentiometer that varies the volume, and the potentiometers' value should be 100k ohm.

The diodes D2 and D3 can be changed with other types of diodes, like Germanium, LEDs, etc.

Title: DST – 2 Distortion pedal
